

Fantasy Racing lets you **predict the finishing order** of every class in a race. When the results come in, you earn points for each driver you placed in **exactly** the right spot. Points add up across the season on the Standings leaderboard. Here's how to play.

1 CREATE YOUR ACCOUNT

- On the **Sign up** screen, enter a **display name** (this is how you'll appear on the leaderboard) and your **email**.
- Choose a **password** with **at least 8 characters**, including an **uppercase** and a **lowercase** letter, a **number**, and a **symbol**. The screen shows a live checklist that ticks off each rule as you type.
- You're signed in automatically — no email confirmation needed.
- Returning? Use **Log in** with your email and password.

On a phone, tap the  menu (top-left) to reach Races, Standings, and Scoring.

2 FIND A RACE

Open the **Races** page. It's organized top to bottom:

- To predict** — open races waiting for your picks.
- Scored** — races with results in **RESULTS IN**
- All races** — a full list you can browse any time.

Tap any race card to open it and see its classes (heats, features, etc.).

3 MAKE YOUR PREDICTIONS

- Each **class** shows its full list of entries.
- Drag** drivers into your predicted finishing order — or use the  /  arrows. Your **#1 is your predicted winner**.
- Press **Save prediction**. Come back and **Update** it anytime until the class locks.

 Once an admin locks a class (or the race), predictions are final and can't be changed.

4 READ THE STANDINGS

- The **Standings** page ranks every player by total points across all events.
- Click a racer** to expand their per-event scores.
- The live **Top 5** leaderboard (left side on web, top on mobile) refreshes automatically after each race is scored.

P HOW SCORING WORKS

Scoring is **F1-style and position-exact**: you earn a spot's points only when the driver you placed there **actually finished there**. Nail P1 and you bank the top score; get P2 right too and you add those points on top. **Being one spot off scores nothing** — the match must be exact.

Your race score is the sum across every class in that event; the Standings add up every race for the season.

On a scored class you'll see your picks beside the finish — columns **Pos · # · Driver · Start · Your pick · Pts** — with the rows you nailed highlighted and a **YOU SCORED N PTS** badge.

FINISH	PTS	FINISH	PTS
P1	25	P6	8
P2	18	P7	6
P3	15	P8	4
P4	12	P9	2
P5	10	P10	1

Positions past P10 score nothing.

Quick example — you predicted A, B, C, D:

✓ Driver A finished P1 → you predicted P1	+25
X Driver B finished P3 → you predicted P2	0
✓ Driver C finished P3 → you predicted P3	+15
Class total	40 pts

Need the details? See the in-app **Scoring** page for the live points table.

Good luck out there.
